Tang Chee Hong

Engineering Manager

cheehongtang@hotmail.com | +65 84233640

I build digital insurance platforms and grow engineering teams - connecting hands-on development, architecture modernization and regional delivery.

EDUCATION & PROFESSIONAL DEVELOPMENT

2009 | Bachelor's Degree (Honours) in Computer Science

Universiti Sains Malaysia

Completed a Bachelor's Degree (Honours) in Computer Science at USM, Malaysia.

Continued learning includes Google Analytics Basic and Advanced courses, PMP (R) certification training, and further courses and certifications.

CURRENT ENGINEERING PRACTICE

My practice has evolved from writing every line to designing the architecture and guiding the development loop. AI handles much of the implementation; I focus on intent, context, review and validation.

Architecture & engineering judgment

Architecture design, Microservices, System integration, Platform modernization

AI-assisted development

Codex, VS Code with GitHub Copilot, AI models & coding agents, Playwright

Leadership & collaboration

M365 Copilot, Engineering leadership, Recruitment & mentoring, Regional delivery, University talent relationships

LANGUAGES & INTERESTS

Languages: Chinese, English, Malay, Hokkien

Interests: Programming, Research, Swimming

PROFESSIONAL EXPERIENCE

Etiqa Insurance

Engineering Manager | 2015-Current

Progressed from web development to engineering management, building digital insurance platforms and supporting regional engineering delivery across Singapore, Malaysia, the Philippines, Indonesia and Cambodia.

Progression: 2015 | Web Developer; 2017 | Senior Web Developer; 2023 | Manager, Web Development; 2023-Current | Engineering Manager

- Built web applications from scratch, designed and developed RESTful APIs for vendors, and integrated with core systems through web services.
- Worked on integrations with banking partners and government services across regional markets.
- Led the team to deliver projects on time and within scope, managed deployments and coordinated resources for project launches.
- Trained team members and managed relationships with the team and stakeholders.
- Built established relationships with university professors to identify promising engineering graduates, with professor referrals forming a key source of strong academic talent.

KEY ACHIEVEMENTS

2015 | Launched the First Online Insurance Platform

Helped build Etiqa Singapore's first online insurance platform and launched its first online Travel Insurance product within six months, laying the foundation for digital distribution.

2016 | Expanded the Digital Product Portfolio

Delivered multiple Personal Accident insurance products and improved SEO and user experience to support online sales growth.

2017 | Launched Singapore's First Online Endowment Plan

Led the launch of Etiqa Singapore's first online endowment insurance plan within two weeks, expanding digital distribution into life insurance.

Read launch announcement (Etiqa)

2018 | Established the Johor Bahru Technology Office

Set up the JB development office to support Singapore, recruiting and mentoring developers to expand engineering delivery capacity.

Etiqa Insurance - ACHIEVEMENTS (CONTINUED)

2023 | Transformed Legacy Architecture

Led the transition from a monolithic system to a microservices architecture. Extended the modernization to Malaysia and launched a new Travel Insurance product within four months.

2024 | Completed Malaysia's Platform Migration

Migrated six major insurance products and decommissioned the legacy online system, contributing to Etiqa regaining Malaysia's No. 1 position in online Travel Insurance.

2025 | Scaled Engineering Capacity

Expanded the Johor Bahru technology centre to more than 80 engineers, strengthening in-house development capability and regional delivery capacity.

2026 | Developed a Unified Regional Platform

Built a single-codebase, single-instance platform to support regional markets, enabling shared capabilities and reducing duplicated development across countries.

Projects: Online System - GI and Life products

Technologies: HTML5, CSS3, AngularJS, Bootstrap, ASP.NET MVC, MSSQL, RESTful APIs, Microservices architecture, Platform migration, Engineering management

Tools: TFS, Slack, Trello, Notepad++, Photoshop

Memolife Pte Ltd

Front End Web Game Developer | 2012-2015

Building the front end of websites, web games and learning applications.

- Owned front-end UI development for websites, web games and web applications.
- Worked closely with back-end colleagues to create web applications using HTML5, CSS3, jQuery, Backbone.js and MongoDB.

Projects: Memolanguage Web App, Memogenius Web Games

Technologies: HTML5, CSS3, jQuery, Bootstrap, Backbone.js, MongoDB

Tools: GitHub, Slack, Trello, Notepad++, Photoshop

Career information and achievements supplied directly by Tang Chee Hong.

PROFESSIONAL EXPERIENCE (CONTINUED)

Version 2 Singapore Pte Ltd

Web Programmer & Support Engineer | 2011-2012

Bringing website development, online shopping and hands-on support together.

- Developed, designed and maintained company websites and the online e-store.
- Enhanced existing web features to make online purchasing easier.
- Built promotional web applications, including Facebook applications, with the marketing department.
- Provided product support by answering daily user calls and resolving problems on site.

Technologies: HTML, CSS, jQuery, PHP, Joomla CMS, MySQL, Facebook Apps

Tools: Dreamweaver, Photoshop

Gistxl Technology Pte Ltd

Application Engineer | 2009-2011

Taking ownership of interfaces, from the first design to implementation.

- Developed, designed and implemented company websites and user-friendly web application interfaces.
- Independently handled the design of web application sections.
- Used CSS, JavaScript and jQuery alongside Adobe Dreamweaver and Photoshop, with SEO knowledge to support website visibility.

Projects: GisXL websites, GistXL TPOT, GixXL newstalk

Technologies: HTML, CSS, JavaScript, jQuery, Flash, ActionScript, SEO

Tools: Dreamweaver, Photoshop, Flash

Flextronics International Ltd

Intern | 2008

Turning industrial training into practical tools for everyday work.

- Created web applications with ASP.NET and C# using Visual Studio 2005 during industrial training.
- Worked on E-Leave, IT Service and Stationery Order applications.
- Customized and designed a SharePoint Portal Server 2003 portal.

Projects: E-Leave Application, IT Service Application, Stationery Order Application, SharePoint

Technologies: C#, ASP.NET, SharePoint

Tools: Visual Studio 2005, Photoshop
