TANG CHEE HONG

ENGINEERING MANAGER | 80 ENGINEERS · 10 SQUADS | REGIONAL INSURANCE PLATFORMS

Singapore / Johor Bahru | cheehongtang@hotmail.com | +65 8423 3640

PROFESSIONAL PROFILE

Engineering leader with 15+ years in software development and digital insurance delivery. Lead 80 direct and indirect reports across 10 squads through multiple team leads, with accountability for people management, technical direction and engineering execution. Track record in establishing engineering capability, modernizing insurance platforms and developing shared architecture for regional markets.

SELECTED LEADERSHIP & DELIVERY IMPACT

2025–Present | Engineering organization leadership Lead 80 engineers across 10 squads; oversee team leads, performance appraisals, hiring, promotions, talent development and resource allocation.

2026 | Unified regional platform Built a single-codebase, single-instance insurance platform supporting shared capabilities across regional markets and reducing duplicated development.

2023–2024 | Architecture modernization Led monolith-to-microservices transformation; migrated six major Malaysia insurance products and retired the legacy online platform.

2018 | Engineering capability expansion Established the Johor Bahru development office to support Singapore operations, including developer recruitment and mentoring.

2017 | Digital insurance innovation Led the launch of Etiqa Singapore's first online endowment insurance plan within two weeks.

PROFESSIONAL EXPERIENCE

ETIQA INSURANCE | 2015–Present

Engineering Manager (2023–Present) · Manager, Web Development (2019–2023) · Senior Web Developer (2015–2019)

- Lead engineering delivery across 10 squads through team leads, coordinating priorities, staffing, talent development and cross-team execution.
- Set technical direction for the squads, align architecture through cross-team forums, and work within CTO-level decision governance.
- Partner with the Program Director and IT Finance on engineering budget planning, workforce requirements and resource prioritization.
- Lead digital insurance engineering for general and life insurance products, including integration with core systems, banks, government services and external partners.
- Earlier milestones: helped launch Etiqa Singapore's first online insurance platform and travel insurance product within six months (2015); expanded personal accident products and online customer experience (2016).
